Welcome

A guide to everything you need to know about Glasgow 2024, A Worldcon for our Futures.

The first part of the Pocket Program deals with policies and procedures—as well as explaining which team can help you if you need something. You'll find details on volunteering, the access teams, the operations (ops) teams, and what we need you to be aware of when you are on site. This section also tells you how to volunteer, where the Information Desk itself is located, and other useful information. This section also contains details about the Listener's team and what to do if you need to report a Code of Conduct violation.

Please take a moment to read through this section—it will definitely help you find your way around Glasgow 2024.

The second part of the Pocket Programme will tell you about all the amazing things we have for you to do while you're here. We have a phenomenal programme, as well as our Main Event items, our Art, Dealers and Displays Halls, and much more!

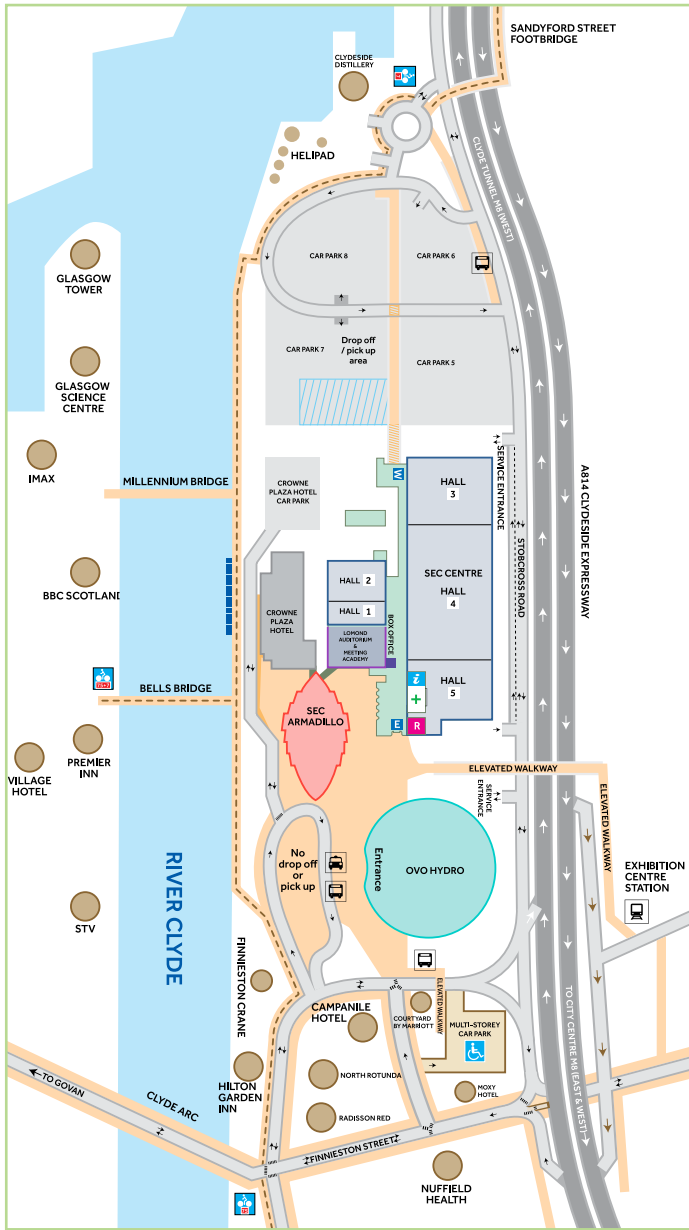

Have a wonderful time at Glasgow 2024, and Make Excitement!

Souvenir Books

Souvenir books will be available to be picked up by attending members at Registration.

Badge Pickup Policy

All members who plan to be present at the Scottish Events Campus (SEC) in Glasgow, Scotland, should plan to bring some form of identification, preferably with a photograph, that will be used to help speed the verification process and distribution of badges, so that members may get on with the important business of attending the 82nd World Science Fiction Convention. The name on the identification must match the official name in the Clyde registration system.

In general, individuals are expected to pick up their badge **in person and only for themselves**. This is meant to help mitigate loss of any member's badge in the process of getting the badge to the member.

Domestic partners and carers may pick-up their partner's/ caree's badge, but **only with both that person's identification and a signed letter of consent from that person** (which will be retained by Glasgow Registration Staff).

Parents **may** pick-up badges for teenage members and child/ infant ticket holders, however, it is preferred that the teenager/ child be present at Registration.

Day tickets can only be picked up on the first day for which the ticket(s) is(are) purchased.

Staff badges and Dealer Hall Passes will be distributed separately. Pick up instructions will be communicated directly to those individuals.

Badge Replacements

Lost badges at any Worldcon are inevitable. Members go to many different places within and outside of Convention venues and may participate in many activities where one may lose their badge. Given that admission to some of the Convention venues **requires** members to present/wear their badges, the Convention must also consider what policy they wish to have regarding lost badges.

The primary reason for the Badge Replacement Policy is so that the members are aware that a process exists for replacement, and how, if necessary, to obtain a replacement badge.

Closely tied to the policy is the concept of a Badge Replacement Fee. This is typically an amount less than the initial price of the lost badge, but substantial enough to encourage the membership to keep close track of their badges to avoid accruing additional cost. It also serves to discourage potentially fraudulent behaviour on the part of members claiming to have “lost” their badge to obtain a second badge, enabling a member to give the second to an associate.

It is the function of the On-site Registrar to exercise their best judgement in the application of the policy and replacement fee.

All found badges should be turned in to Convention Operations or to Registration.

Badge Replacement Policy:

1. If a member loses or temporarily misplaces their badge, they should first check with the Information Desk and inquire if someone has turned in the lost badge. If this occurs after the Information Desk has closed for the day, they should go to Convention Operations.
2. If the Information Desk (or Convention Operations) does not have the lost badge, the member should proceed to Registration to inquire if someone has turned in the lost badge.
3. If Registration does not have the lost badge, the member should request a replacement from Registration staff. Registration staff will then use Clyde to verify that the requesting individual is a member (and what type of member) and collect the determined replacement fee before issuing a replacement badge of the appropriate type and reprinting/affixing the name label. Replacement fees have been published in a separate table.

The replacement fee may be refunded, with the approval of the Treasurer, should the member find their lost badge and return the second badge to Registration before Registration closes on 12 August, 2024. Reimbursement amounts are based on the amount of time the badge was lost, and are published in a separate table. Reimbursements will be issued after the Convention by the Treasurer.

It is recommended that once a Badge Replacement Policy has been determined, a public announcement be made through social media and be published on the Convention website.

Lost staff badges may only be issued by Registration, during Registration hours, with Division Head approval. Convention Operations will have generic staff badges which may be used after hours if urgently needed.

Facilities

ATMs

There are three ATMs in the SEC, one connected to the small shop, which charges for withdrawals, and two on the main concourse with no charge.

In addition, there is an ATM in the Crowne Plaza hotel, which also charges for withdrawals.

Opening times

The SEC building will be open from 09:00 each day to 02:00 the following morning, Thursday through Sunday. The SEC building will close earlier on Monday after the Closing Ceremony. Convention halls will open at 10:00.

Fan Bar in the Crowne Plaza will open at 11:00 each day of the Convention (noon on Sunday) and will close at 02:00 the following morning. The Fan Bar will also open before the start of the Convention on Wednesday night at 18:00.

Cloakroom

There is a cloakroom in the SEC, which charges a small fee per item (£2) where you can leave coats or bags.

Food & Drink

On the public concourse through the middle of the SEC there is a bar/restaurant called Clydebuilt. There is a small shop selling confectionery, newspapers, and sandwiches. The Clydebuilt also contains a deli/bakery. These are all open to the general public.

There will be a number of food trucks and a bar situated in Hall 4, only open to attendees of the convention. Bars will close at 01:00 to allow people to finish their drinks and exit the building before 02:00.

All the hotels on site (Crowne Plaza, Village, Campanile, Radisson Red, Hilton Garden Inn, Moxy, and Courtyard) have bars and restaurants which will be open to all. In addition, we will have a dedicated Fan Bar in the Crowne Plaza in the Argyll Foyer. The Fan Bar will also open before the start of the Convention, Wednesday night at 18:00.

Parties

Parties will be in SEC Hall 4, Thursday through Sunday evenings. The Dead Dog party will be in the Crowne Plaza on Monday evening starting at 20:00.

Volunteers

Hall 4

- Thursday 09:00 to 19:00
- Friday–Sunday 09:00 to 20:00
- Monday 09:00 to 16:00

Glasgow 2024 is an event run by fans for fans. You don't have to be an expert to volunteer: you can choose from a variety of tasks and areas and there are tasks for all levels of experience. Even a few hours helps! If you can help us to make Glasgow 2024 a memorable event, please volunteer at the Volunteer Desk.

There's a variety of rewards for volunteering:

- volunteer hours earn you groats, which can be used as currency in venue restaurants and with some vendors;
- you earn a raffle ticket for every two hours of volunteering - winning tickets are drawn daily;
- you gain access to the Volunteer Lounge, where you can relax, get to know your fellow volunteers, and enjoy a snack or a refreshing drink;
- for 12 hours of volunteering, you will get a t-shirt with a design not available elsewhere;
- and also for 12 hours of volunteering, you will get to pick one reward from a list of special priority rewards.

Learn more about earning volunteer rewards by visiting the Volunteer Desk!

Exhibits

Artshow

Located in the central block of Hall 5, the Artshow this year has more than fifty different artists showing their works for your viewing pleasure. Most of the work on display will be available for purchase either through silent auction or immediate purchase, and we have a specialised print area set up on the right of the Artshow which will be dealing with all queries and purchases.

This year in particular, we are delighted to be able to feature a special showcase from our Guest of Honour, Chris Baker, known around the world as Fangorn. This showcase can be found in the middle of the Artshow with benches set around it to allow leisurely viewing.

Dealers

Located around the Artshow in Hall 5, this year we have more than a hundred and fifty dealers tables with the shiny things that all of us love. From Yarns to Games, Comics to Jewellery, the dealer's hall has everything you could want for gift ideas. We also have a massive range of authors and publishers in the halls with us this year, from the giants like Waterstones and Gollancz, to the award winning independents like Luna Press.

Our merchandise stand will also be in this hall, in the doorway between halls 4 and 5, as well as our signature Gin, available in limited quantities by the Merchandise stand and manned for us by the creators of the Gin, Pixel Spirits.

Displays

Completing the triangle of the AD&D division is the Display area. Located in Hall 4 on the right of the hall, we've worked very hard this year to provide things that will astound and delight.

From the Batmobile to the scale model of a laser accelerated space probe suspended in the air above the hall, we've left the big items at the front, but when you move into the hall, you'll see that we're not just about the big things.

From the specialist displays of the Glasgow Science Festival (**only available on Friday, don't miss them**) to the Virtual Reality scanning display of the Museum of the Metaverse and the Exoplanet construction program of St Andrews University, we have enough to keep you occupied throughout your stay.

The Book of Worldcon

We wanted to give everyone a way to be a part of the convention and as this is the Worldcon for our Futures, we want everyone to leave their thoughts with us for future generations to be able to read, so we developed the Book of Worldcon, a massive tome with enough pages for every member of Worldcon to be able to leave a message for the future.

You'll find the Book on the front row of the Fan Tables, closest to the door., Bbring your own pen or use one of the hundred+ pens that we brought in for you.

Fan Areas

We are all fans, and at G24, we recognise that above all else. As you come into Hall 4 from the concourse, you'll either be greeted by a Batmobile and a space probe, or if you come a little further

down the hall, you'll find the dedicated Fan Zone. Here you'll find more than thirty fan societies and clubs, a dedicated Fan Lounge with comfortable seating and decoration, and all the party tents for the evening sessions.

The Eye of the Storm

We know that Worldcons are tiring, so we developed the concept of the Eye of the Storm, a place in the middle of the hall, designed to be quieter and calmer than all the other areas. Within this area, you'll find the Teen Lounge, the Parents and Toddlers Area, the Freebies zone (with comfortable seating to ponder over which things to take), and the Brian Aldiss Exhibit, a display of many pieces of artwork and writing from the master and a chance to see his desk and bookcases in person.

Right in the middle of the Eye of the Storm are two special features, surrounding the Tree of Worldcon.

The first of these exhibits is Terri Windling and the wildness of Dartmoor, a stunning display from Terri and ten other artists showcasing the beauty and unspoiled wonder of the moors.

The second is the memorial wall, but unlike previous years, this is now the "Wish You Were Here" wall. Representing the past, the present, and the future, it will have three different walls with three different purposes.

The past will have the names of all those who have sadly left us as a remembrance of how much we miss them.

The present will have a number of cards and pens to write down the names of those that are still with us, who could not be with us in person, so that they can be there in sight if not in body. Anyone bringing photographs is more than welcome to put them up on the wall.

The future is for those who have not yet been to a Worldcon, but who we would want to see with us when next we all meet. Again, there will be card and pens to write names and messages upon the wall.

The Tree of Worldcon

As part of Terri Windling's exhibit, we are also placing a live tree in the middle of the hall and will have a number of ribbons to tie around the branches of the tree as a thought for the future, a loved one, or something that we're thankful for. There will be enough ribbons for everyone to be able to tie their thoughts to the tree, and, in the aftermath of the convention, the tree already has a new home waiting in the gardens of one of our volunteers so that the thoughts left there will live on.

These things are only a small example of the things that we have available in Halls 4 and 5, we urge you to come along and find out just how much we've put in there for you.

Food Trucks

In addition to the variety of food and drink available outside the SEC, we have made provision (no pun intended) for the SEC themselves to provide six food trucks and a drinks truck. We say drinks truck because we know everyone wants real ale, but as of the time of going to press, the SEC is still confirming what they will be supplying and in what quantity. The Food and Drinks trucks can be found in Hall 4 at the far left of the hall, and with seating for nearly 10% of the convention at a time, there should be no trouble in grabbing a bite to eat between programme

items or taking a longer break to recharge before heading back out again.

The food trucks will be available from when Hall 4 opens, to midnight, and the drinks truck will be available from the opening of Hall 4, till last orders, which will be at 01:00 on the following day to allow for clearing up.

Sponsors

Glasgow 2024 would like to thank the following organizations for sponsoring portions of the convention.

Glasgow Civic Support

Glasgow 2024 expresses its appreciation to the city of Glasgow for its warm welcome and ongoing support. We are delighted to have received direct financial support from Glasgow City Council (via the [Glasgow Convention Bureau](#)) and [Visit Scotland](#) (Scotland's national tourist organisation).

Worldcon Passalong Support

Worldcon operates a Passalong system whereby a portion of any surplus from a given event is passed forward to upcoming Worldcons. Given that each Worldcon is financially independent, this scheme is an important way in which we share and reduce financial risk. Glasgow 2024 is delighted to have received passalong funds from Discon III (the 2021 Worldcon held in Washington DC) and [Chicon 8](#) (the 2022 Worldcon held in Chicago, Illinois).

Other Sponsors

Glasgow 2024 is delighted to have received sponsorship from the following organisations:

- [Conversation](#) (Eastercon 2023)
- [Dublin in 2029](#) (Worldcon Bid)
- [Los Angeles in 2026](#) (Worldcon Bid)
- [Luna Press Publishing](#)
- [Temple Dark Books](#)

Grant Providers

Glasgow 2024 is delighted to have received a grant from [ConZealand 2020](#) (the 2020 Worldcon, held in Wellington, NZ and virtually around the world)

About Our Programme

For Programme Attendees

Our programme includes panels and presentations on a wide range of topics, plus workshops, readings, and the chance to chat with authors and creators as well as with like-minded fans.

The daily programme starts at 10:00, in all venues including online (later on Thursday). Most programme items are scheduled to last for an hour, with a 30-minute break between items.

Note that some programme items are marked as 18+ due to the content that will be discussed.

Online

Our online programme includes panels, workshops, and table talks, which will take place in an online space accessible from our member portal, as well as a large number of panels, presentations, and performances streamed live from Glasgow.

Many items will be available to watch at a later date. The online programme guide will list which ones are recorded.

You'll be able to discuss all our programme items and ask questions during panels and presentations on the Glasgow 2024 Discord server.

Academic Programme

The Academic Track has presentations and round table discussions on a variety of subjects that touch on science fiction, fantasy, and other genre elements as well as sessions on the history of Scotland. Papers are grouped by theme.

Table Talks

Formerly known as Kaffeeklatsches and Literary Beers, table talks offer you a chance to sit down with authors, creators, and other interesting people - including our Guests of Honour and Special Guests - for a small informal chat. All in-person table talks will be in Hall 4 in the designated area from 10:00 (later on Thursday) until 17:00 (earlier on Monday). Some table talks will also take place online.

Sign-ups for table talks will be online only from Tuesday 6th August at 12:00, Glasgow time. Links to all of the sign-ups will be available at: <https://glasgow2024.org/whats-on/programme/tabletalks>. If you are unable to sign up online, help will be provided at the Information Desk.

The process for signing up for in-person and online table talks is the same. Exact times for when each block of sign-ups closes will be released closer to the date of the Convention. You will be notified by email at least 12 hours before the start of the table talk if you have been given a space. If you do not have access to your email, you will be able to check at the Information Desk.

There are seven spaces available for each in-person table talk (except where there's more than one host). If there are more sign-ups for a particular table talk than there are spaces, successful applicants will be chosen by a random lottery. There is no advantage to signing up for a table talk early. As long as you fill in the form before sign-ups close, you will have an equal chance of getting a spot.

A lottery will also be used to select waitlist spots. If you have been waitlisted, you will be able to turn up for the table talk, and we will let you know if any spaces have become available due to cancellations or no-shows.

If you don't mind whose table talk you go to, you can also sign up to attend any table talk during a specific time slot. In this case, you will be allocated to any available free space at a random table talk during that time. You never know who you might get to chat to!

If you have signed up, but can no longer attend a table talk, please email us as soon as possible at tabletalks@glasgow2024.org with "Table Talk Attendance Cancellation" in the subject line to let us know.

If you have any access needs, you can let us know on the sign-up form.

Autographing

Autographing will take place in Hall 4 in the designated area from 10:00 (later on Thursday) until 17:00 (earlier on Monday). Each author, creator, or other person who is signing items will have their own queue. Please follow the directions of Autographing staff and be courteous towards other fans when queuing.

Guidelines to help autographing run smoothly:

- You are limited to three items per author for each pass you make through the queue. In certain cases, the Autographing staff may need to lower this number.
- Once you have had your maximum number of items signed, you will be able to join the back of the queue for a second turn if the author has time to handle repeat requests.
- Authors have a maximum of one hour for their autographing sessions. If there are too many people for the author to sign for within this time, Autographing staff may need to close the queue for that author before the session is over.
- To avoid misspellings and misheard dedications, post-it notes will be supplied to spell your name in advance and ask for any desired dedications.
- Seating is available if you are unable to stand in line for any length of time. Your place in the queue will be marked, and you can go straight to the front once the marker gets there.

Workshops

Our workshops at Glasgow 2024 cover a wide range of topics and interests, including writing and publishing, worldbuilding, crafting, and music. They will largely take place in-person but we will also have a small number available online.

Sign-ups for workshops will be online only from Tuesday 6th August at 12:00 Glasgow time. Links to all of the sign-ups will be available at <https://glasgow2024.org/whats-on/programme/workshops/>. If you are unable to sign up online, help will be provided at the Information Desk.

The process for signing up for in-person and online workshops is the same. Exact times for when each block of sign-ups closes will be released closer to the date of the Convention. You will be notified by email at least 12 hours before the start of the workshop if you have been given a space. If you do not have access to your email, you will be able to check at the Information Desk.

Workshop spaces will be limited. If there are more sign-ups for a

particular workshop than there are spaces, successful applicants will be chosen by a random lottery. There is no advantage to signing up for a workshop early. As long as you fill in the form before sign-ups close, you will have an equal chance of getting a spot.

A lottery will also be used to select waitlist spots. If you have been waitlisted, you will be able to turn up for the workshops, and we will let you know if any spaces have become available due to cancellations or no-shows.

If you have signed up, but can no longer attend a workshop, please email us as soon as possible at workshops@glasgow2024.org with "Workshop Attendance Cancellation" in the subject line to let us know.

If you have any access needs, you can let us know on the sign-up form.

Meetups

Meetups (sometimes known as affinity groups, Birds of a Feather, or fan chats) are small discussion groups of interest to specific groups of people. They might be guided discussions or free-form chats, depending on the topic. Smaller meetups of fan groups and crafters will be in Hall 4 in the designated areas. Other meetups for affinity and professional groups will be scheduled in specific rooms, and some meetups will take place online.

No sign-up is required but if there are more people attending than the designated area or room has space for, we ask that you split the party and find your own space to continue the conversation; for example, in the Hall 4 social space or on the mezzanine in the Crowne Plaza.

Children's Programme

The Children's Programme takes place in the Jura and Barra rooms in the Crowne Plaza hotel from 13:00 to 17:00 on Thursday, 10:00 to 17:00 on Friday, Saturday and Sunday, and 10:00 to 15:30 on Monday.

The Children's Programme is staffed by vetted staff and volunteers at all times, and Glasgow 2024 has appointed two Safeguarding Officers in accordance with UK and Scottish regulations. Children must have registered and received their Worldcon badges at convention registration before they can attend Children's Programme.

Please note that childcare is located in the Campanile Hotel which is approximately a 10-15 minute walk away.

Our Children's Programme is packed full of fun and exciting events including a visit from our guest astronaut, hands-on science workshops, musical sessions, interactive writing and storytelling sessions, and lots of crafting.

While we expect the main enjoyers of our Children's Programme will be in the age 6–12 group, particular sessions are geared more towards either preschool children or younger teens. There is a recommended age in each session description to help guide your choices.

Adult supervision is required at all times for all children aged 6 and under, including during programme sessions. For children aged 7–11 we recommend a responsible adult remains with the child, particularly during workshops to provide assistance if needed, but otherwise Children's Programme staff will be

operating a sign-in-sign-out system. Children aged 12 and above may attend unaccompanied.

Some workshops will require signing up in advance due to a limited number of spaces. The responsible adult will need to sign up in the same way as for other workshops at <https://glasgow2024.org/whats-on/programme/childrens/>.

Filk

As well as filk concerts each day, we will have filk circles every night from 21:00 till late in the Staffa/Shuna room in the Crowne Plaza hotel. A secure instrument store will be available nearby.

Gaming

Games Area

The Games Area will be running from when Hall 4 opens in the morning and will be available until Hall 4 closes at 02:00. Rent, Shuffle, and Roll will be running a games library through the day and will allow all members of Worldcon to borrow games for the length of the convention.

Additionally, Games Masters will run games throughout the day and we'll be offering games on demand as well as organised play. The full schedule will be available closer to the convention time, but we anticipate having a variety of tabletop games, from classic Traveller to Blood on the Clocktower.

With gaming being one of our main focuses, we have brought on the specialists at RP Haven and West End Games to help out across the convention, and if you have any questions, they'll be happy to help.

Gaming Area and Children

All attendees aged under 16 need to have their parent or guardian present if they are in the games area and playing a game. The parent or guardian does not need to play the game with them, but they will need to be present. In addition, some games have an age limit and this will be strictly adhered to.

ARC at Glasgow University

Vision

The [University of Glasgow](#) has a strong presence in studies of the fantastic and gaming in all of their forms. Our collaboration with the University, and particularly with the [Centre for Fantasy and the Fantastic](#) and the [Games and Gaming Lab](#) presents compelling perspectives to convention members not usually available at a Worldcon. We hope that members of the Worldcon will leave the convention with the expanded horizons that come from interactions with a research community that is immersed in the study of genre, literature, media culture, and their significance for society.

What is happening and where is it happening?

A series of items on campus at the [University's Advanced Research Centre \(ARC\)](#), ranging from Fantasy and Gaming research showcases to [Fantasy MLitt](#) Masters taster sessions and playtesting of UofGGamesLab research-led games. Members of the University community will also be participating in panels in the main programme at the SEC.

The ARC is located at [11 Chapel Lane, Glasgow G11 6EW](#) on the Glasgow University campus, close to the Kelvingrove Museum. We are using the seminar suite and exhibition space, which are both [fully accessible](#).

The central part of the collaboration will be three half-day sets of events:

Games and Gaming Lab Research Showcase (and Playtesting) - Friday 9th August (PM)

From crisis simulation games on spaceflight disasters to building Robert Burns' farm in Minecraft, brought to you by staff and student members of [UofGGamesLab](#), including [Dr Tim Peacock](#), Lecturer in History and Lab Director. Explore a range of gaming-related research and engagement activity on different stalls, from video gaming to board, card, wargame, and tabletop games (including those developed by staff and students at the University of Glasgow). Participate in interactive seminars and lecture/Q&As on topical gaming research subjects (from global challenges to giant robots!), and playtest the latest in research-led games from UofGGamesLab.

Centre for Fantasy and the Fantastic Research Showcase — Saturday 10th August (PM)

Hear about the full range of research on Fantasy being conducted at the University of Glasgow in a series of lightning talks from around fifteen different researchers affiliated with the Centre for Fantasy and the Fantastic, including [its Directors, Professors Dimitra Fimi and Matthew Sangster, its members, and its doctoral researchers](#). The talks will be split into two sessions with time for questions and for meeting Centre members in breaks between and after the talks.

Fantasy Master's Taster Sessions - Monday 12th August (AM)

Discuss a range of fantastic texts with tutors and doctoral students affiliated with the University of Glasgow's unique [MLitt in Fantasy Literature](#). The Centre for Fantasy and the Fantastic will offer a series of 75-minute small-group seminars, including discussions of early fantastical narratives, canonical authors such as J.R.R. Tolkien and Ursula K. Le Guin, contemporary Fantasy fictions, and fantasies in diverse forms.

For Programme Participants

See the [Open Hours](#) section for when the following are open.

Programme Participant Check-in

Programme participants should collect their programme packets here, available from Wednesday. Please register and collect your Worldcon badge at convention registration first.

Programme packets include your schedule, a table tent for display during your programme items, and any relevant programme badge ribbons.

Programme Participant Green Rooms

For your convenience, we have two Green Rooms: one in Boisdale in the SEC and the other on the mezzanine balcony in the Crowne Plaza Hotel.

Please attend the Green Room in the same venue as your programme item at least 15-20 minutes before the item's start to collect your complimentary beverage and speak to your fellow panellists. This is especially important if your panel is a hybrid one with online panellists.

Note that if you are taking part in programme items in the Crowne Plaza after the Green Room there closes, you should attend the SEC Green Room instead.

Online panellists should follow the instructions issued to them to join the online Green Room.

Programme Operations Office

Programme participants with requests to make or issues to resolve can attend the Programme Operations office in Boisdale in the SEC. You can also contact Programme Operations via email to programme@glasgow2024.org.

Event, Performance

As the world enjoys Part 2 of Denis Villeneuve's cinematic vision of Frank Herbert's masterpiece, solo performance artist Dan Collins has been wondering - what if we distilled Dune down to its component parts? What if we added some whimsical and comedic songs? What if the whole story could be told in one hour, by one man, with one guitar? Behold: Dune! The Musical! Fresh off the back of a critically-acclaimed run at Edinburgh Festival in 2023, Dan's show is the perfect way to experience this SF classic and is the opening event of the convention!.

Karl Popper was a philosopher who was instrumental in the development of the modern scientific method. Carl Sagan was a scientist who championed the scientific method and the art of sceptical scrutiny to help us understand the universe and our place in it. Humans (and other animals) are prone to unconscious biases, which have significant evolutionary benefits, but also cause a multitude of problems. How can we learn from these two great polymaths of the 20th century to challenge our biased brains to explore reality and make better decisions?

Dealing With Your Dark Side

🕒 1:00 - 60 minutes

📍 Lomond Auditorium

📺 Livestream

📺 Recorded

YA Literature, Panel

Fantasy is not all fun and wish-fulfilment but is also a genre of desire and longing that often forces protagonists to confront their inner

demons. Are such stories endemic to children's and YA literature, or are they artificially injected in order to transmit adult preoccupations? Has fantasy for children and young adults become darker over time? And if so, what does it mean? Our panellists discuss these questions and more as they explore the darker side of modern stories.

The Universe: Reality or Simulation?

"Do you think we're living inside a computer simulation, Mum?" My kids love delaying bedtime by asking me tricky questions, and this particular existential crisis left me utterly lost for words. To try and find an answer, I've been throwing all the physics I know at the problem. As the Astronomer Royal for Scotland, I'm used to creating giant maps of the universe that transport us 10 billion years back in time. But what if all the ancient light that I've spent my entire career collecting is just a series of computer impulses in an elaborate simulation of my own reality? I know how to simulate an entire Universe of galaxies: have I been naive to think a future scientist couldn't create a complete virtual world much closer home?

For Glasgow WorldCon, I'm going to share the journey I've taken to understand how one day we might simulate our own lives. We'll look at the laws of physics that govern the universe and delve into the inner workings of your computer and artificial intelligence. I'll ask why philosophers feel so challenged by the concept of living in a predetermined virtual world when it's clear that interactions on the smallest and largest scales in our universe can be mathematically defined. By exploring the intersections of physics, astronomy, and philosophy, I'll be inviting you to reconsider what is 'real'.

Magic as Art vs Magic as Science (Online)

📺 Nevis (Online)

📺 Livestream

Literature, Panel, Worldbuilding, Fantasy

What kinds of worlds can be built and stories be told when magic has rules that can be inferred from strict experimentation vs. when magic is a matter of beauty and taste? Is there overlap? The principles of perspective in representational art derive from mathematics, the principles of colour theory derive from optics, and the principles of colour creation derive from chemistry. Yet in our world there is often a hard divide between what is considered art and science. What could the division between art and science, or challenges to that division, mean for fictional magical systems?

Much of early modern Europe saw a frenzy of witch-hunting, but Scotland in the 16th and early 17th centuries was particularly badly affected, with thousands put on trial and hundreds executed. "Thou shall not suffer a witch to live," the King James Bible proclaims, words that King James himself took to heart, developing an obsession with witchcraft after becoming convinced that Scottish witches had attempted to drown him at sea by calling up a storm. He was also the patron of Shakespeare who wrote Macbeth. How do all of these influences play out? Was the king a driver or follower of the deadly, broader cultural darkness of the milieu?

We're delighted to be joined by the Science Ceilidh Band who have performed at Worldcon before. They will take time at the start to teach you the right moves as well.

We also hope to see many Landing Zone tartans swirling!

More on Ceilidhs: Scotland has a strong tradition of song, poetry and dance, and Glasgow 2024 will fully embrace this. We will run a number of dance events during the convention, starting with a Ceilidh (KAY-lee) on Thursday night. Descended from the Gaelic word for 'gathering' or 'party, nowadays when people think of a Ceilidh, they think of a fun filled night of wild dancing, good music and great company! Ceilidh dancing is truly glorious when done right, fuelled by a sense of community and often a few pints. Here at Glasgow 2024, we want to honour this tradition and hold our own Ceilidh! Literature, Science and Technology, Panel

The panel discusses how ideas from the past - whether presented as science fiction or factual predictions - have stood the test of time. Which

have come true, which were way off, and which are still future possibilities? And who proved better at predicting the future? Was it the scientists, mathematicians and engineers... or the science fiction writers?

"Mrs. Hawking" is the first in a trilogy of fully staged and professionally filmed theatrical shows. Part Victorian adventure and part superhero story, our story begins in the year 1880 in the reign of Queen Victoria. Young Mary Stone has just arrived alone and friendless in London, unsure of what to do with herself after a lifetime of keeping house for her late parents in India. She has no choice but to accept a position as a house girl for Mrs. Victoria Hawking, an aloof, mysterious society widow who seems to want nothing to do with her. But when she discovers Mrs. Hawking's true business, as a secret champion to the otherwise helpless women of London, Mary is drawn into a world of new heroic purpose battling against devious blackmailers, rescuing kidnapped children, and struggling against the restrictive place their society forces on women. From Melisa Scott's *Shadow Man* to Yoon Ha Lee's *Ninefox Gambit*, speculative fiction has long been a place to play with ideas of gender. We will consider the ways that authors have used the freedoms and limitations of speculative fiction to explore the space of gender and expand on the boundaries around gender expectations.

YA Literature, Panel

OK, we tried, but it's time to admit it - we messed up the world. YA literature often acts as the little boy who dared to cry out "The emperor has no clothes!" But should literary youth also be tasked with saving the world we've created? Do non-literary youth even want to, or could we stop them if we tried? Some teenagers sneak out to save the world while others "just"

save their parents and loved ones. Is this trope empowering or another form of unrealistic escapism? All this and more in this panel for the generations.

When the Future Hates and Fears Us: Techno-orientalism in SFF

🕒 2:30 - 60 minutes

📍 Alsh 1

Panel

For fans and creators of colour, underrepresentation, erasure, and invisibility are major problems in SFF. For East and Southeast Asian fans and creators in particular, this is compounded by the racism and xenophobia of techno-orientalism: a damaging trope where East Asianness specifically is shorthand for dehumanisation, materialism, and dystopia (think Blade Runner, Neuromancer, or Cyberpunk 2077). How do we create and critique in genres that see us as the enemy?

imaginary': how does SF shape the expectations and actions of a wide range of stakeholders in science and technology, from engineers to policy makers, and why it is important for students to be aware of this?

The Ig Nobel Prizes, and Improbable Research more generally, celebrate "research that makes people LAUGH... then THINK". Put another way, it celebrates the fun of science. In this panel, we will have dramatic readings of scholarly research articles that are new to the people reading them. The audience will then get to ask these 'experts' about the papers they have presented. Hilarity, and then thinking, will ensue.

Writing and Business of Writing, Panel, Writing

In the 20th century, it was possible to live on a writer's income. Today, as the midlist disappears, most writers depend on a day job or a partner's income to make ends meet. How has this economic reality shaped the experience of navigating the industry? Does it close doors to writers from less advantaged backgrounds? What might it mean for the future of the industry?

Literature, Panel, Fantasy, Worldbuilding

What kinds of worlds can be built and stories be told when magic has rules that can be inferred from strict experimentation vs. when magic is a matter of beauty and taste? Is there overlap? The principles of perspective in representational art derive from mathematics, the principles of colour theory derive from optics, and the principles of colour creation derive from chemistry. Yet in our world there is often a hard divide between what is considered art and science. What could the division between art and science, or challenges to that division, mean for fictional magical systems?

Decolonising Narratives of the British Empire Exhibition of 1938

🕒 10:00 - 30 minutes

📍 Meeting Academy M4

Academic, Presentation, Scotland, History

The Glasgow School of Art has produced significant research into this event, including the production of a meticulously researched photo-real, 3D model of over 100 buildings and structures that comprised the Exhibition, three video interviews, recollections of visitors, use by schoolchildren, and immersive experiences in game engines and VR. We will showcase this research and, crucially, demonstrate the need to reassess narratives of the Exhibition from a post-colonial perspective. Whilst earlier research focused on architectural achievements, we are now using mixed-methodologies, including narrative co-design, to highlight the (previously-erased) voices of marginalised peoples and investigate polyvocal narratives about Glasgow's heritage.

Scotland's First Flight: 1507

🕒 10:30 - 30 minutes

📍 Meeting Academy M4

Academic, Presentation, Scotland, History

In 1507 alchemist John Damian flew from the ramparts of Stirling Castle to demonstrate the efficacy of flight to King James IV. He plummeted to earth and broke his thigh bone. We might not know of this momentous failure were it not for the seething envy of poet William Dunbar. When an enemy's ignominious defeat is not sufficient humiliation, the truly vengeful turns to poetry. Dunbar glories in Giovanni Damiano's failure to launch, but recording his crash landing is not sufficient to exorcise the revulsion he feels at the alchemist's unnatural magic--nor is it sufficient to dispel his apparent favour with the king, who remains fascinated with the modern science of alchemy. Unlike John Leslie's more measured account in *A Historie of Scotland*, Dunbar portrays Damian's flight as not only a failure, but as the logical end of a swindler and possibly even a murderer--and one of the 'sonis of Sathanis seid'. Dunbar sees the birds who attack him as 'Sanct Martynis fowle' representing nature as an aspect of the divine. The poet, claiming also to be divinely inspired, must take their part against the 'deviant con artist.'

From great monuments commemorating rich merchants and powerful statesmen in the Necropolis in Glasgow and Greyfriars in Edinburgh, to humble memorials celebrating the lives of ordinary folk elsewhere, a story can be read from Scotland's greatest heritage asset - her three thousand graveyards. This lively, heavily-illustrated talk by Dr Jim Mackay of the award-winning Kirkmichael Trust explains how our memorials reflect our history, and how the art carved on them tells us so much about how our ancestors lived and their attitudes to life and death. From elaborate and abstract pre-Reformation designs to grim post-Reformation symbols of mortality or trade, graveyards tell Scotland's story from a unique perspective - to the Graveyard Reader.

So you're looking at a bone in your garden. Now what? This talk will cover the basics of what human skeletal remains can tell us - and what they can't. Human versus non-human mammal? How many people are here? Probable age at death, probable sex (noting that gender and sex are NOT the same), clues to ancestry, and indicators of life history. Plus - what did they eat, and did something eat them?

WARNING: none of the content is graphic - no meat on the bone - but there will be LOTS of photographs of skeletons

The Dance from France: the importance of Scottish sources in the study of early nineteenth century French quadrille technique

🕒 12:00 - 30 minutes

📍 Meeting Academy M4

Academic, Presentation, History, Scotland

France's dominance in western social dance continued into the early nineteenth century with the advent of the quadrille, a multi-part dance in square formation that is ancestral to both Irish set dancing and American square dancing of the present day. Two treatises published in Edinburgh and one Scottish manuscript provide the earliest and most detailed English-language information on the basic techniques, range of variations, and later evolution of the steps of the French quadrille. Alexander Strathy's Elements of the Art of Dancing (Edinburgh, 1822)

and the anonymous Scottish manuscript Contre Danses à Paris (1818) are well-known to dance historians for their detailed descriptions of early quadrille style. More obscure is Madame Suinglé's Petits Secrets in Dancing (Edinburgh, 1848), which documents the transition in movement style from the elaborate ballet-like technique of the early nineteenth century to the gliding walk of dancers of later in the century. This paper will provide a non-technical review of the contents of these three works and explore their particular connections with France as well as their significance to the modern study of social dance evolution.

Jacobites, Amerindians, Liberals, and an Alligator

🕒 1:00 - 30 minutes

📍 Meeting Academy M4

Academic, Presentation, History, Scotland

Robert Ferguson's treatment of Scotland's colonial policies drove him to a Jacobite defence of the governments and rights of Native Americans. Ferguson was a Scottish Minister and Radical Whig who converted to Jacobitism. He joined the ranks of Whiggish Jacobites calling for a Stuart restoration along classically liberal, Lockean lines. In 1699 he published A Just and Modest Vindication of the Scots Design, for the Having Established a Colony at Darien. This book seeks to substantiate the Scottish colonial title to Darien by sketching a theological framework of native rights. Ferguson applied his principles of contract theory, limited government, natural property rights, etc. to Amerindians. He even advocated rebellion against colonial powers. Sir William Keith, governor of Pennsylvania, and a former Jacobite utilized the Vindication as he crafted his 1730 Cherokee Treaty which influenced the 1732 Carolina-Creek treaty and the Yamacraw/Creek treaties of James Oglethorpe, another Jacobite, from 1733 to 1743. Ferguson's Whiggish Jacobite principles informed a Jacobite approach to Native American relations for over a decade. This paper argues that the existence of this Jacobite

defence of indigenous rights offers an alternative trajectory of British Empire in the Americas under a Stuart restoration. There is also an alligator involved.

"Mrs Hawking: Base Instruments" is part of a trilogy of fully staged and professionally filmed theatrical shows (they can be watched in any order

and without having seen the other shows). Part Victorian adventure and part superhero story, our show begins with Mary Stone. Mary's life changed forever three years ago in London, 1880 when she accepted a job as a housemaid to reclusive London widow Victoria Hawking. Hired by the lady's well-meaning nephew Nathaniel Hawking, at first they seem shut out at every turn by this brooding and mysterious woman. But when they discover her true identity as a superhero, righting the wrongs done to the least powerful individuals in the city, they are eager to not only help her in her important work, but also to be the close presences in her life that she has been missing. But Mrs. Hawking is slow to trust or connect with anyone, particularly the nephew who reminds her so much of her late husband who trapped her into a married life she did not want. But with Mary and Nathaniel's steadfast insistence to be there for her when she needs it, they have formed a true superhero team— and maybe even a family. Now in 1883, when Mrs. Hawking is injured in the line of duty, the press for Mary to master her society avenging becomes all the more urgent as a Mariinsky dancer approaches them to solve the murder of the prima ballerina. But Mary must decide if she can live with the heavy cost to living the life that Mrs. Hawking leads while nephew Nathaniel must confront the consequences of keeping his aunt's secrets. Requires no knowledge of the previous show. Content notes: mentions of period-accurate drug use. Running time: 81min

We Sang to Stop Ourselves From Crying: Women's Work Song in the Scottish Herring Industry

🕒 1:30 - 30 minutes

📍 Meeting Academy M4

Academic, Presentation, History, Scotland

The image of the "herring lassie" is an enduring one in Scottish identity. Old photographs and paintings of fishwives and fish gutters, grinning in

front of rows of barrels or looking forlornly out to sea, remain popular with tourists who visit the Scottish coast. But who were these women who worked hard gutting herring for the largest fishing industry in Europe? From the mid-19th to mid-20th centuries, thousands of women followed the herring shoals around Britain, Ireland and beyond to gut freshly landed fish and pack them into barrels. They faced harsh working conditions with a resilient spirit.

In this talk, Meg Hyland will use the words of the women's work songs to illuminate lives full of hard work, blood, fish guts, tears and, above all, laughter. The women sang while working, at dances hosted in their small wooden huts, and while striking for higher wages. They sang in Scottish Gaelic, English and Scots, learning from each other and sharing music across ethnic and national lines. Listen to archival recordings and learn how herring gutters used music to keep their spirits up in one of the toughest jobs for women in all of Scotland's history.

Is it important that we establish our credentials as a species that can sustainably manage and fairly govern our own world first, or should we seek to spread through the galaxy as rapidly as possible, consuming off-world resources as the need arises?

Attaching Clasps to Your Beads

🕒 2:30 - 60 minutes

Hall 4 (Crafting Area) - Costume and Cosplay, Workshop, Crafting, How To

Stringing beads isn't the hard part of making bracelets or necklaces, it's how to attach the right clasp in a way that's secure and seamless. In this session, you can make a bracelet or short necklace and learn how to securely attach a clasp that sets it off and looks great without knots or loose thread showing. We can also look at mending broken jewellery if you have something you want to bring (unless it needs soldering).

Literature, Society, Panel, Horror, Science Fiction, Legends, Folklore and Fairytales, Fantasy

Monsters, from the cyclops eating Odysseus' men to the dragon atop its hoard of gold, tell us about the bounds of behaviour, but what about when those monsters are reclaimed? What is the story of Medusa really telling us, in 2024? What happens when a pontianak tells her own story, as in Zen Cho's The House of Aunts? What can we learn about ourselves, and our world, from (thinking about) our monsters?

In 1946 the University of Pennsylvania unveiled ENIAC, the Electronic Numerical Integrator and Computer. Although Britain's COLOSSUS had helped break German WWII codes, it remained wrapped in secrecy, whereas ENIAC's arrival was announced in the press. It represented a huge step forward in how it could be programmed and reprogrammed and applied to multiple purposes. The unveiling caused a sensation and set off a race to develop ever more powerful and flexible devices. The panel looks back at these early developments at the dawn of the computer age.

Short Fiction with Teeth

🕒 2:30 - 60 minutes

📍 Dochart 1

Literature, Panel, Science Fiction, Politics

In today's quickly changing political landscape, short stories are an agile, responsive form that allows a writer to respond to specific moments of injustice, tragedy, or explosive change as they happen and explore with granularity the lived experiences of marginalized people. With the increasing politicization of technology and scientific development, science fiction especially provides rich ground for political response and commentary. What opportunities and limitations do short formats and speculative genres present to authors writing with a political lens? What, if any, obligation do science fiction authors have to engage with the political and social realities of the world around them? This diverse panel of short story authors and editors will explore these questions and more.

Beyond the Pankhursts – Scottish Suffragettes and Campaigning for the Vote in Scotland

🕒 2:30 - 30 minutes

📍 Meeting Academy M4

Academic, Presentation, History, Scotland

The decades-long campaign for the right to vote on equal terms with men is often framed as something that only really happened in London. However, there were suffragist societies and suffragette activism across the length and breadth of Scotland. Some of these built on previous campaigning such as the fight against chattel slavery and the temperance movement. Protests & Suffragettes, a creative project led by a team of artists, activists, and local historians has spent nearly 10 years working to recover and re-voice the histories of women activists in Scotland.

During 2020/21, we conducted archival research and worked with academics and librarians to recover the history of the suffrage movement in Scotland and the women involved in it. From this we created a trump card game and an accompanying education pack, which we gifted to 100 schools across every region of Scotland. I will cover some of the key women, stories and events that we found. As Adele Patrick of Glasgow Women's Library once inspiringly asked... "How many Scottish suffragettes can you name?"

A Case of Witch Hunting in Scotland: Corstorphoine 1649

🕒 3:00 - 30 minutes

📍 Meeting Academy M4

Academic, Presentation, Scotland, History

The pursuit of accusations of witchcraft made against six women and one man in the village of Corstorphoine near Edinburgh in 1649 can usefully open

up the history of witch hunting in Scotland between 1563 and 1736. Among the thousands of victims, these seven cases may be small in number - five people died, and two others were released after a spell of imprisonment - but the vividly detailed records in the local church minute book tell a story typical of innumerable others. Accused and accusers were ordinary inhabitants, engaged in a confrontational procedure that casts great light on both everyday life in early modern Scotland and the beliefs that prompted conflict and the loss of several thousand lives. Though typical, this microhistory is a challenge to some of the stereotypes that still tend to dominate histories of witch hunting in this period.

Glasgow Worldcons are not without their traditions: each of the previous ones have had a show written and performed by Reductio Ad Absurdum. In 1995 it was their loving demolition of Dune (or The Sand Of Music); in 2005 it was Lucas Back In Anger, their smash-and-grab on all things Star Wars, which was nominated for a Hugo Award for Best Dramatic Presentation (Short Form) despite enraging Star Wars fans by reducing the second trilogy to a 12 minute ABBA karaoke with cardboard costumes. In 2024 their offering is a unique take on the Oscar-winning sensation, Everything, Everywhere, All At Once that becomes Nothing, Nowhere, Never Again. Reductio is basically Ian Sorensen and Phil Raines plus whoever else they can blackmail into performing. This year they have suckered Geoff Ryman, Emjay Ameringen and Julia Daly into joining them in the madness. Film/Television/Video, Panel

What is it about the combination of spies and the just-about-fantastical that keeps us coming back? From the psychedelic trip that is The Prisoner to the laser battles of Moonraker to the denial of physics in the Fast and Furious films, what is it that appeals about the splicing of spies and the near-impossible? Who are our favourite players in the farther-fetched Great Game?

Homelessness in Genre Fiction

Literature, Society, Panel, Politics, Guest of Honour, Fantasy, Science Fiction

People experiencing homelessness regularly appear in genre fiction. All too often those portrayals fall back on tired and sometimes dangerous stereotypes which don't acknowledge the individual as a fully rounded person with hopes, aspirations, likes and dislikes. At a time when more and more people are homeless, and we have a wider definition of what homelessness is, it is important we consider how we write stories to enable them to see themselves in our fiction, rather than just appearing as corpses and victims to move the narrative along. The panel, some of whom have themselves been homeless, will discuss these portrayals, the fiction that gets it right, and how we can write complex and nuanced stories of homelessness without falling back on stereotype, cliché and misunderstandings.

Note that the terminology around this emotive topic is constantly evolving. During the discussion the participants will be talking about their own lived experiences and will use the language they feel most comfortable and familiar with.

Children's Literature, YA Literature, Panel

In life and in literature, we want to protect children and adolescents from pain as long as possible, but we know it's just a question of time as, whether we like it or not, loneliness, grief, longing, and other difficult emotions are a part of life. This panel aims to examine how children's and YA literature handles such complicated topics and how favourite works can soothe, console, and inspire hope in readers of all ages.

Stroll with the Stars, Amusement

Join your fellow convention members, and perhaps some big names, for a stroll (2 miles/3.2km) along the Clyde to and from Tall Ship Glenlee, which is moored downstream from the SEC, led by Farah Mendlesohn and Mike Scott. The route is wheelchair-accessible, and we will adjust our pace to match the abilities of the slowest walkers. We advise against joining this walk if you are on the programme at 10:00, because we might not be back in time for you to make your way to the Green Room. Note that you won't be able to board the ship or enter the visitor centre until they open to the public at 11:00. Sign up at the Registration Desk by 18:00 the previous day, and meet at 09:00 outside the Crowne Plaza hotel's main entrance.

Academic, Panel

Within the science fiction (SF) landscape of China, women have played vital roles from the genre's earliest days. Yet, recognition as a distinct and influential group has only begun to surface in recent years. The discourse around Chinese female SF often reflects the broader Chinese-Anglophone dialogue where Chinese (female) SF is scrutinized as the newcomer against the backdrop of established norms with an expectation to exhibit certain "Chineseness" or "femininity." This roundtable seeks to unravel these complexities without resorting to essentialist views.

First published in the US in 1924, *We* by Russian writer Yevgeny Zamyatin is a seminal work of science fiction. It wasn't until 1988 that it was published in Russia - clearly this was a book that the people in power in the Soviet Union wanted erased. Yet it ushered in a new genre - the future dystopia - and in doing so, gave birth to the many dystopian novels and films which have found their way into our popular culture, from directly inspiring George Orwell's 1984 to influencing novels such as Ursula K. Le Guin's *The Dispossessed* and Kurt Vonnegut's *Player Piano*.

NASA's DART: The Spacecraft That Moved an Asteroid

🕒 1:00 - 60 minutes

📍 Gala

Science and Technology, Presentation, Astronomy and Space

In 2022, the Double Asteroid Redirection Test spacecraft deliberately crashed into a small asteroid, Dimorphos. The DART mission investigated a possible technique for moving asteroids, perhaps useful someday for "planetary defense" if a threatening object is ever discovered. An Italian spacecraft, LICIACube, accompanied DART, snapping pictures of its final moments and the messy plume of its aftermath. This year Europe will send a followup mission to Dimorphos to examine the damage.

Filk Concert: TJ and Mitchell Burnside Clapp

🕒 4:00 - 60 minutes

📍 Staffa/Shuna

Filk, Concert

TJ and Mitchell Burnside-Clapp have been writing and singing filksongs since before they even met, in fact, since before either of them knew what filk was. Between the two of them they have accumulated over 80 years of performance experience, more than a dozen convention GoH spots, five Pegasus Awards for Excellence in Filking, three somewhat musically inclined children, and some amount of what might be called "fame" in unexpected circles. TJ and Mitchell perform songs about space, technology, science fiction, and humor from their own imaginations as well as from their many creative friends, including songs by TJ's filk singing group Technical Difficulties (which features Linda Melnick, Sheila Willis, and Jean Stevenson in its various incarnations). They are delighted to share their eclectic musical stylings with the 2024 Glasgow Worldcon.

Shapeshifting Stories: Respinning Fairy Tales & Myths

🕒 4:00 - 60 minutes

📍 Hall 1

Literature, Panel, Legends, Folklore and Fairytales, Guest of Honour, Fantasy

Fairy tales, legends and myths may well be the oldest narrative form, having their roots in the oral traditions of pre-literate human societies more than 100,000 years old. These ancient stories have been retold, reimagined, and subverted by writers for centuries, from Shakespeare to Disney to Anne Sexton. The 21st century has seen the popularity of such retellings explode, along with a new academic interest in its many manifestations. Why? This panel of fairytale experts seeks to answer this question, and many more about the history, meaning and purpose of wonder tales from around the world.

Literature, Panel, Fantasy, Science Fiction

The divided self reaches back to R. L. Stevenson's Jekyll and Hyde and James Hogg's Confessions of a Justified Sinner and forward to Star Trek's Tom Riker and Marvel's Hulk via the work of psychiatrist R. D. Laing. Modern authors to explore it include Christopher Priest, Lois McMaster Bujold and Matt Ruff who posit it as a trauma response while David Levithan and Lauren McLaughlin used it to explore identity issues. So what makes this trope so attractive? Why do we keep coming back to it, and where are we seeing it done well?

Applied Science Fiction: the Who, What, Why and How

🕒 7:00 - 60 minutes

📍 Meeting Academy M1

📺 Livestream

📺 Recorded

Science and Technology, Presentation, Science Fiction

Creating inclusive conversations that discuss which future we want has never been more important, and science fiction has an important role to play in this. Through short stories, whose world-building has been iterated with scientists, everyone can take a step back and consider plausible scenarios. Using real examples of projects with academia, government and think-tanks, this talk will give an overview of what applied science fiction is and why it has value to SF writers, scientists and society.

There can't be many people with internet access who haven't heard the name of Studio Ghibli. It's one of the most famous film studios on the planet, producing classics like Spirited Away, Howl's Moving Castle and Princess Mononoke. Both Princess Mononoke and the studio's perennial favourite My Neighbour Totoro have been transformed into stage shows. Concerts of their magical film scores draw huge crowds. But there's a lot more to Studio Ghibli than just movies. Its art is driven by inspiration from Japanese and Western art, by energies from the streets of Japan and by the mystical qualities of its traditions and its wild places.

Helen McCarthy, who wrote the first books in English on anime and on Ghibli's co-founding director Hayao Miyazaki, will take you on a journey through the studio's history and inspiration, with time and space to appreciate selected artworks and a list of sources - books, websites and places to visit - if you want to explore further.

That Would Look Good with a Dragon

🕒 1:00 - 60 minutes

📍 Hall 4 (Crafting Area)

Costume and Cosplay, Workshop, Crafting

Learn to crochet a two-dimensional dragon at this practical workshop. Your dragon can be used to embellish clothing or a costume, or it can be an art piece in its own right. This workshop is suitable for adults and teens. It is helpful if you have crocheted before, but if the dragon defeats you, you could always crochet a cat, which is easier.

Information about sign ups for this workshop will be available at glasgow2024.org/whats-on/programme/workshops.
